

SUBJECT: ENVIROMENTAL LABELLING REQUIREMENTS FOR PACKAGING D.L.2023

As of 01/01/2023, the Legislative Decree no. 116/2020 came into effect, which transposes the European Directive 2018/851 on waste and the European Directive 2018/852 on packaging and packaging waste.

In the clarification note from the Ministry of Ecological Transition dated May 17, 2021, it is explained that, for neutral packaging in general, particularly those used for transport and/or possible semi-finished products, considering the difficulties faced by operators, both economically and structurally, in meeting this obligation, it becomes necessary to consider an alternative to the traditional labeling to be applied directly on the packaging itself.

Therefore, for these packaging materials, which are mainly part of the B2B channel, the identification of the packaging material composition can be conveyed and communicated by the manufacturer through the transport documents accompanying the goods or through other external, even digital, supports.

GEL GIUSSANI SNC has therefore opted to indicate the appropriate Conai labeling on its company website, where the labels related to the packaging used for packaging the supplied products are listed, in order to raise awareness among the receiving operator about their proper disposal.

PALLET WOOD FOR50
STRETCH FILM LDPE4
ADHESIVE TAPE PPL
ADHESIVE TAPE PVC
BAGS PP5 BOXES PAP20
